

Elands are proud to be relaunching our Skin Smart Campaign!

Noticed a new lump or bump on your pet?
Is there a strange growth that hasn't gone away?
We're here to help!

This campaign offers our clients the opportunity to investigate skin lumps or growths that may otherwise go unexamined, providing you with peace of mind and expert care for your pet.

At Elands, we utilise advanced AI technology in conjunction with experienced human pathologists to assist in diagnosing unexplained skin lumps for our patients. This process can be completed during a standard consultation. A small needle is used to collect a sample of cells from the lump. These cells are then analysed in our state-of-the-art in-house laboratory, with results typically available within two hours.

**SPECIAL OFFER: In-House Cytology £150 for up
to 2 lumps, using 4 slides. Save £70!**

**Get in touch today to book an appointment
Dunton Green 01732 452333**

Offer available to Elands Vets clients only. For a limited time only, during the Skin Smart Campaign, fee may apply if not sampled during routine vaccination or consultation appointment.
